

Retractable Bollard

- **DBO-114R0-600/750/900**
(Carbon Steel with power coated)
- **DBO-114R4-600/750/900**
(AISI 304 Stainless Steel)

Description

retractable bollard provides the most economical and convenient solution for garage, parking, Villa and prevents the vehicle or other properties from being stolen. It will neither bring damage to the environment nor occupy any space.

Retractable bollard is the most economical type among the bollards. Its buried structure solves the bollard retraction and storage problems when the access is open. Unique PA oriental design minimizes the attrition on bollard surface and assures its long service life. Our patented multifarious professional mechanical key and T type flip lifting handle provide users with more elegant appearance and easier operations. Besides, retractable bollard can also work together with other series of Bollards.

Features

- + Guarantee garage safety
- + Stop the access of ilegal vehicle
- + Enforce flexible access control
- + Save bollard storage space
- + Long service life
- + Unified with other series of bollard

T-type handle
